

NAME: WALEEJA KHAN

SECTION: BAI-2A

ASSIGNMENT: 1

ROLL-NUMBER: 25P-0005

PART A: PLANNING (PREWRITING)

a) Who is the intended audience for this report?

The intended audience for this report is the IT department and Administration of the university.

b) What is the purpose of this report?

The purpose of this report is to compare Uni-chat and campus connect based on its features and students' accessibility to select the best one.

c) List five important criteria to compare these apps.

- **Data Usage:** App data usage must be noticed.
- **Compatibility:** Apps must be compatible enough to work on various hardware.
- **Performance:** Speed and performance of apps on devices with limited RAM.
- **Content Sharing:** Compatible enough to share content like messages, images, and voice.
- **Accessibility:** Easy accessibility to students.

d) Which features are most important for university-wide communication?

The most important features for university-wide communication are low data usage and easy accessibility to university students to ensure that every student gets messages and emergency news from administration on time.

PART B: DRAFTING (WRITING)

a) Create a draft comparison chart for Uni-chat and Campus connect.

Features	Uni-Chat	Campus Connect
Data usage	Low	High
Performance	Fast and lightweight	Slow on older phones
Accessibility	Easily accessible to students	Needs >2gb RAM
Media type	Text and PDF.	Text, images, video, and voice.

Write a draft recommendation paragraph explaining which platform seems more suitable and why.

Based on the comparison between both platforms, I think Uni-chat is more suitable to work as the university's official messaging platform. Although it has limited features as compared to campus connect but it is fast, easily accessible to students and it works on all phones whether old or new. This will make sure that the students get all the updates on time without any hassle.

PART C: REVISING (IMPROVING CONTENT)

a) After exchanging drafts, list two major suggestions for improvement.

The draft will be much improved if I give some more evidence that data usage and accessibility are more important than having more features. Also, my draft does not clearly mention the issues in campus connect because of which I preferred Uni-chat over it.

b) Does your recommendation match the comparison data? Explain.

Yes, my recommendation matches the comparison data as Uni-chat is performing better compared to campus connect in terms of data usage and student accessibility.

c) Identify unclear or missing information in your draft.

My draft explicitly tells that Uni-chat is a better option as compared to campus connect but it does not implicitly tell that how this will benefit students in a long-term manner, because although it has less features but at least every student can take benefit from its minimal features. Also, my draft misses the unique features available on campus connect which will not be available on Uni-chat.

PART D: EDITING (IMPROVING STYLE & MECHANICS)

a) Edit your draft and correct three issues related to grammar, clarity, tone, or formatting.

After comparing both platforms, I think Uni-chat is more suitable to work as the university's official messaging platform. Although it has limited features as compared to campus connect but it is fast, easily accessible to students and it works on all phones, whether old or new. This will ensure that the students receive all the notifications on time without any hassle.

PART E: PUBLISHING (FINAL OUTPUT)

a) Prepare a final, polished comparison chart.

Features	Uni-chat	Campus Connect
Data usage	Low	High
Accessibility	High	Moderate
Device speed	Excellent on all phone	Poor on older phones
Available options	Limited	More than Uni-chat

Write a final recommendation paragraph in a professional technical writing style.

After comparing both platforms, I think Uni-chat is more suitable to work as the university's official messaging platform. Although Campus Connect has a lot of extra features like images, videos and voice broadcast which Uni-chat does not have but Uni-chat is fast, uses little data and is easily accessible to students and it works on all phones, whether old or new. This will make sure that the students get all the notifications on time without any hassle. While campus connect gives a short time ease by giving more options, Uni-chat gives long term reliability and easy access to all students around the campus.
